

CHORE-TIME[®]

BOLT-TOGETHER FEEDERS

ECONOMICAL FEEDERS FOR SIMPLICITY

- › Precision feeding
- › Reduce waste
- › Bolt-together design reduces shipping and maintenance cost

BOLT-TOGETHER FEEDERS

Chore-Time's Bolt-Together Dry Feeders offer an economical alternative to welded feeders while still providing outstanding feed management. Bolt-Together Feeders are available in nursery, wean-finish and finish designs in single- or double-sided versions. The bolt-together design of these feeders helps to reduce shipping and maintenance costs.

Feed-Saving Design

- › Reverse incline on feed trough feed saver lip helps to catch and prevent food waste.
- › V-shaped feeder bottom drains feed-clogging moisture away from feed dispensing area.
- › Outward facing sidewall flanges are designed for a stronger, easier-to-clean feeder.
- › Easy-to-clean feed trough lip flange also adds strength.
- › Drop tube holder is standard and helps secure the feed drop tube from an overhead fill system.

Engineered for Lasting Durability

- › Feeder is manufactured using all 304 Series stainless steel for long life.
- › Metal edges are safety hemmed to minimize exposure.
- › Hemmed edges, with no gap, make the feeder easier to clean.
- › Feeder is assembled using nylon-insert lock nuts to keep bolts tight.
- › These feeders can be customized to meet specific center-of-the-pen or fence-line feeding configurations.
- › Custom designs available.
