

NURSERY PIG MAT

REDUCES EXPENSIVE FEED WASTE
AND PIG MORTALITY

- › Pig Mat helps to keep nursery pigs healthy, improves animal comfort and increases young pig productivity
- › Insulates little pigs from cold weather and the cold concrete
- › Handles on Nursery Pig Mat allow for easy transport and storage

NURSERY PIG MAT

Producers in wean-to-finish hog facilities can place PigTek's Nursery Pig Mats on top of the barn's cement slats to reduce drafts on little pigs. The mats can also be used as a feeding platform to hand feed pigs following weaning to encourage feed intake.

What You Need to Know

- > PigTek's Nursery Pig Mat helps to get nursery pigs off to a fast start while avoiding diseases by keeping pigs warm and dry.
- > The unique design of the 4 x 6 ft. (1.2 x 1.8 m) Pig Mat allows nursery pigs to lay on an elevated surface and stay dry, helping to insulate the little pigs from cold weather drafts and cold concrete slats.
- > Feeding newly weaned pigs on the Nursery Pig Mat is an important step in maximizing feed intake and early growth performance.

Product Features

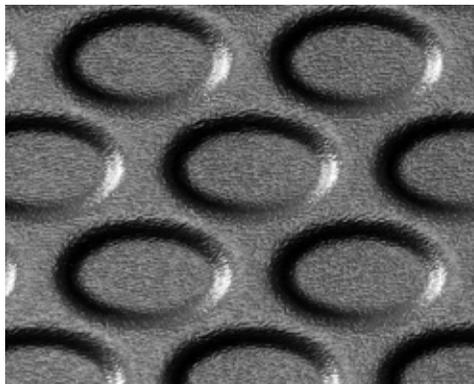

- > Creep feed stays in the 1/8 inch (3.2 mm) deep oval indentations of the Nursery Pig Mat and keeps the little pigs from moving it around, helping to reduce expensive creep feed waste.
- > Feed Saver Lip on the mat has a 1-1/4 inch (32 mm) raised height that keeps creep feed on the mats and reduces the amount of creep feed that falls through the concrete slats.
- > Easier to handle than rubber mats, the polyethylene 4 x 6 ft. (1.2 x 1.8 m) Pig Mats feature handles and are lightweight to make them easy to carry, transport and store.
- > Each mat easily accommodates approximately 50 pigs.
- > Pig Mat is easy to pressure wash clean to meet biosecurity management measures.

Nursery Pig Mats are great for creep feeding.

Each Mat accommodates approximately 50 pigs.

1/8 inch (3.2 mm) Deep Oval Indentations holds Creep Feed to prevent feed waste. This is a big advantage over smooth or biodegradable boards.

Pig Mat provides thermal comfort by insulating little pigs from cold weather and cold concrete.

1-1/4 inch (32 mm) raised feed saver lip keeps expensive starter feed on the mats, preventing it from falling into the manure pit.

Durable Nursery Pig Mats are lightweight for ease of carrying to desired location.

The Ceiling Mat Rack holds approximately 15 Nursery Pig Mats.

Part No. PT1168
 Dimensions: 4 x 6 ft. (1.2 x 1.8 m)
 Feed lip height: 1-1/4 inch (32 mm)
 Material: Non-conductive High-Density Polyethylene,
 Shipping Weight: 13 lbs. (5.9 kg)
 Country of Origin: USA
