

STRAP WINCH

THE ALTERNATIVE TO CABLE WINCHES FOR VENTILATION APPLICATIONS

- › Capacity of 2,000 pounds (907 kg) with up to 6 feet (1.8 m) of travel.
- › Speed of 12 inches (305 mm) per minute.
- › Easily make adjustments using incorporated switches.

STRAP WINCH

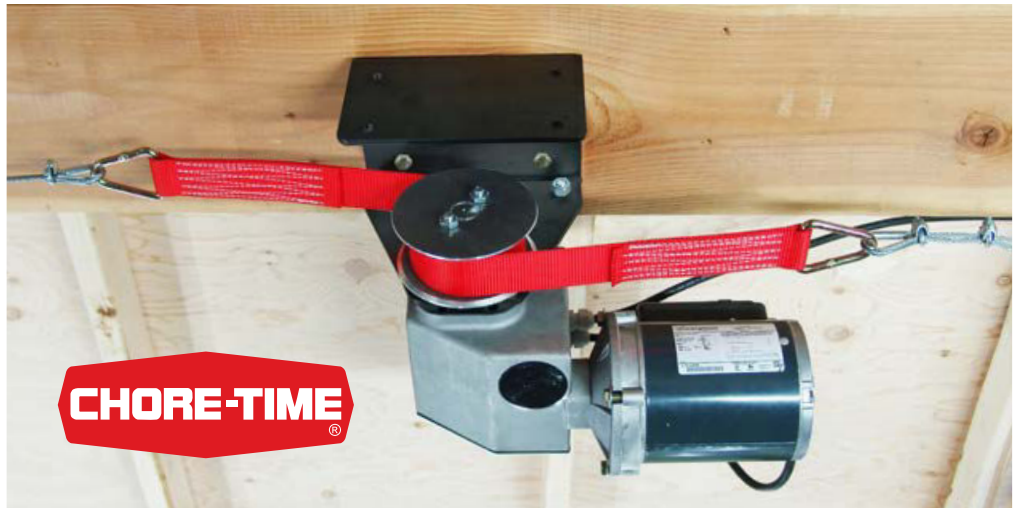

Chore-Time's reliable, heavy-duty strap winch operates inlets, tunnel doors, sow feed drops and curtains smoothly and quietly for swine barns.

What You Need to Know

- > This compact winch consumes less barn real estate for mounting and operating the winch.
- > The compact winch design makes it easier to mount this unit on the ceiling.
- > Strap or web belt winches last longer and are more durable than cable because they don't have wear points like a cable over a pulley.
- > This Chore-Time strap winch has few moving parts – it basically consists of a motor and gearbox.
- > Easily make limit switch adjustments using incorporated toggle-style switches.
- > Winch can be operated manually or automatically using the Chore-Time PigCentral® Control.

Product Features

- > Capacity of 2,000 pounds (907 kg) with 6 feet (1.8 m) of travel.
- > Speed of 12 inches (305 mm) per minute.
- > Includes internal limit and safety switches.
- > Maintenance-free gearbox uses innovative oil-based lubrication technology.
- > No greasing is needed for shaft or bearings.

Winch Specifications	
Load Rating	2,000 pounds (907 kg)
Lift Rate Per Minute	12 inches (305 mm)
Travel Distance	6 feet (1.8 meters)
Electrical Rating	1/3 HP (0.25 KW) 220 V 50/60 Hz
Weight of Unit	49 pounds (22.2 kg)

Use the CHORE-TIME® Strap Winch with PigCentral® Control for a complete package.

Toggle-style switches inside unit permit the user to select local or remote operation. In local mode, the user can operate the unit manually while standing at the winch. This is particularly convenient for setting limit switches during installation and for making other adjustments.
