EFFECTIVE AND EFFICIENT PERFORMANCE

EXCLUSIVE DESIGN ACCOMMODATES VARIOUS FEED TYPES

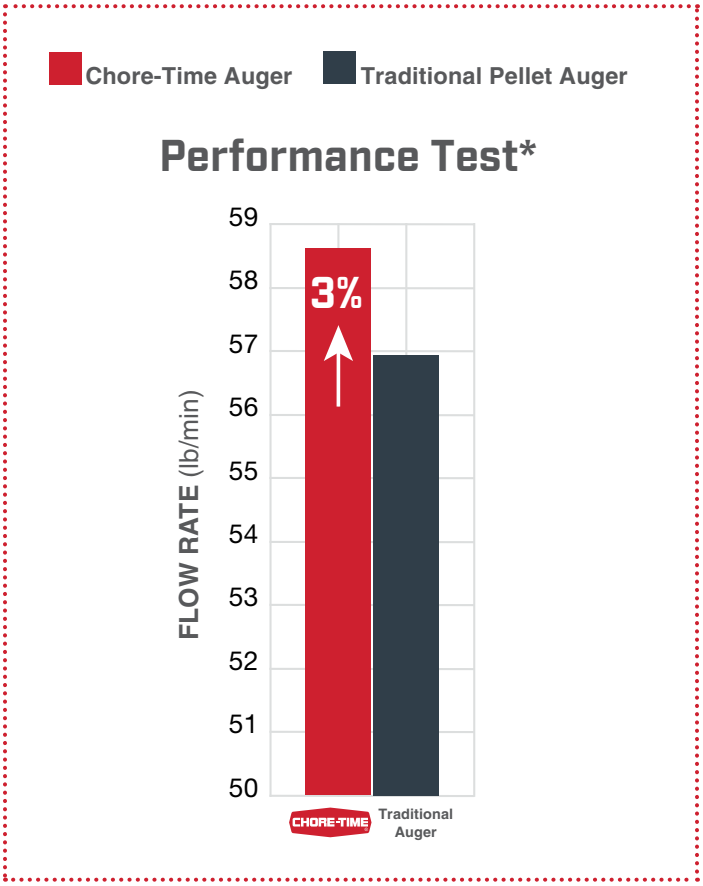
Gently Handles Both Mash & Pellets

Chore-Time's Model 75 Plus FLEX-AUGER® System is specifically designed to deliver feed pellets with less degradation and with more integrity than other flexible auger systems. This Chore-Time FLEX-AUGER System provides gentle handling of the feed flowing out of the feed bin. While other pellet auger systems have a tendency to crush or grind pellets, the Model 75 Plus FLEX-AUGER System's gentle approach effectively and efficiently delivers both mash and pellet feed.

PELLET DEGRADATION REDUCED ON AVERAGE BY 45%*

3% Higher Average Flow Rate

Being gentle does not mean slow! In test situations, Chore-Time's Model 75 Plus FLEX-AUGER System delivered a nearly 3%* improvement in the feed flow rate for mash and pellet feeds. Quick, yet gentle feed handling helps producers to benefit from possibly higher feed conversion rates while potentially avoiding the digestion issues caused by broken pellets.



Model 75 Plus FLEX-AUGER® System

Tube Diameter	Delivery Rate*	Feed Types	Maximum Particle Size
3 in. (75 mm)	50 lb (23 kg) per min.	Mash, Crumbles, Pellets (18% Moisture Content)	1/4 x 3/8 in. (8 x 13 mm)

ECONOMICAL PERFORMANCE

15% Cost Savings Feed Delivery System

A standard 2,400-head barn could see an estimated 15% cost savings with Model 75 Plus FLEX-AUGER® Delivery System.

COST SAVINGS

- Cost Savings on the Reduced Number of Motors Needed
- Cost Savings on the Reduced Number of Extension Hoppers Needed
- Cost Savings for Retrofit Installation by Utilizing Existing Model 75 Tubing

Run Longer Auger Distances with Fewer Motors & Extensions

Chore-Time's Model 75 Plus FLEX-AUGER System offers you the unique benefit of being able to run longer distances with fewer motors and extensions, a bonus for producers with larger facilities.

This Chore-Time flexible auger system is designed to convey feed up to 300 feet (91 m) without the use of an extension hopper. This is 50% longer than a traditional flexible auger.

MAXIMIZING RETURN ON INVESTMENT

QUICK PAYBACK ON INVESTMENT

- IMPROVED CASH FLOW

EFFICIENT USE OF RESOURCES

- LESS SERVICE COST
- BETTER LABOR UTILIZATION

10-YEAR PRORATED WARRANTY

Another long time feature of the Chore-Time FLEX-AUGER® System that hog farmers really like is the 10-year prorated warranty on the auger itself. See Chore-Time's full written warranty for complete details.

*Performance data based on 2019 in-house testing. Actual results may vary.

DESIGNED UNLIKE ANY OTHER AUGER IN THE INDUSTRY

We are dedicated and focused on listening to you and providing you advanced pig management systems with Chore-Time's PigCentral® Feeding and Ventilation Systems. Through advancements in technology, we are able to help provide increased benefits in pig health, feeding and growth, and smooth management of operations. This helps you to make your complete system more efficient, economical and effective.

EFFECTIVE AND EFFICIENT PERFORMANCE

Unique Model 75 Plus FLEX-AUGER® System

Our innovative Chore-Time Model 75 Plus FLEX-AUGER® Feed Delivery System combines a specially-designed coreless auger with standard Model 75 FLEX-AUGER Tubing to deliver performance, integrity and auger strength. Chore-Time's newest member of the FLEX-AUGER System family is the only flexible auger on the market designed to efficiently and effectively handle a broad range of pig feeds.

FLEX-AUGER System Invented in 1961

It is hard to imagine today's modern hog production facility without a centerless, flexible auger for the feeder fill system. FLEX-AUGER Coreless Auger Feed Delivery System was originally invented by Chore-Time in 1961. In the years since then, Chore-Time's FLEX-AUGER System has proven to be the most reliable and best system ever devised to deliver feed. While it has been often imitated, the FLEX-AUGER System with all of its benefits has never been equaled!
